THE PROPERTY

Milan

Living surrounded by greenery in the heart of Milan. Just a favoured few, like the owners of this magnificent apartment, can enjoy such a privilege. Based on a project by Vincent Van Duysen – one of the world's top 100 architects and interior designers according to Architectural Digest – everything here has been transformed to create a unique living experience embraced by natural light, admiring windows that have become picture postcards thanks to Van Duysen's expertise and insight.

Precious and timeless materials made unique by the skilled excellence of Italian craftsmanship; cutting-edge technology to ensure maximum comfort and safety; an obsessive attention to detail that brought to Milan the firm which installed the windows at the Louvre Museums.

"You will never tire of this style of contemporary architecture" remarked Van Duysen when delivering the home that was entrusted to his care for more than 4 years of work and that transformed it into one of the city's most luxurious apartments.

The living area can hold over 100 people thanks to two magnificent terraces, while the professional kitchen allows you to welcome them with five-star service.

The master suite, superb in size and magnificent in terms of comfort and finishings, splendid in the panoramic views.

"After a full day of traffic in Milan I really loved being able to come back to my haven of peace with its stunning views of gardens and trees, something truly missing in the centre of Milan. I also appreciated being able to live in an apartment of 450+ square metres on a single floor with two incredible terraces from which to enjoy the simplicity of Vincent Van Duysen's touch: it's timeless and exhilarating!" V.R.
